EDUCATION

Pusan National University

Ph.D. in Chemical Engineering, GPA: 3.96/4.50

Busan, KR

2020–2025

- Thesis: “Accelerating Nanoporous Materials Discovery for Adsorptive Separations: from Database to Machine Learning Models”

Jimei University

M.S. in Naval Architecture and Ocean Engineering

Xiamen, CN

2018–2020

- Thesis: “Study on Adsorption Storage of Methane on Typical MOFs”

Zhejiang Ocean University

B.S. in Marine Engineering (Ship Building and Repairing)

Zhoushan, CN

2014–2018

- Thesis: “Design of a Stacked-Type Hatch Cover”

EXPERIENCE

National University of Singapore

Postdoctoral Research Fellow at MACE Group

Singapore, SG

2025.12-2026.12

- Fine-tuning LLM for Validation of MOFs
- Validate if LLM understand crystal structures, and give the reason for unphysical structures.
- Graph Transformer - Based Method for Solvent Removal of MOFs
- Develop a machine learning model for free & coordinated solvent removal for MOFs.
- Refinement of MOF Structures by Generative AI
- Explore the application of generative AI in refining MOF structures.
- CO_2 Conversion by MOF
- Explore performance of CO_2 conversion by CALF-20 by DFT simulation.

Pusan National University

Postdoctoral Associate at Chung Research Group

Busan, KR

2025.09-2025.11

- CoRE MOF 2026 Database (Co-work with Prof. Kulik Group at Massachusetts Institute of Technology and Prof. Moosavi Group at University of Toronto.)
- Updated the CoRE MOF database and investigated the sensitivity of not computation-ready structures on machine learning models.
- Machine Learning Potential for MOFs (Co-work with Prof. Rosen Group at Princeton University.)
- High-throughput density functional theory calculations and training machine learning force fields.
- Zn-MOF for Direct Air Capture (Co-work with Prof. Koh Group at KAIST.)
- Found stable structure with high performance for carbon capture.

- Quantum Machine Learning Discovery of Nanoporous Materials for Direct Air Carbon Capture (Co-work with Prof. Moosavi Group at University of Toronto.)
- Analyzed the structures that simulation fail.

DEVELOPMENT

- **CoRE MOF** Computation-Ready Experimental Metal-Organic Framework database & package
PyPi • Github • Website • Zenodo
- **PACMAN-charge** Partial Atomic Charges for Porous Materials based on GCN package
PyPi • Github • Website
- **MOFClassifier** A Machine Learning Approach for Validating Computation-Ready MOFs package
PyPi • Github
- **ToBaCCo-MOF** Topologically Based Crystal Constructor package (a refactored version)
PyPi
- **SESAMI** Characterization Tools for Porous Materials Using N_2 /Ar Adsorption package (a refactored version)
PyPi

TEACHING

- **Teaching Assistant** at Pusan National University Spring 2025
Introduction to Computational Nano Science and Engineering (CG3500768-062)
- **Teaching Assistant** at Pusan National University Fall 2024
Current Events in Chemical and Biomolecular Engineering (CG1501061-062)
- **Teaching Assistant** at Pusan National University Spring 2024
AI for Chemical and Materials (CG2001538-062)
- **Teaching Assistant** at Pusan National University Fall 2022
Introduction to Data Science for Chemical Engineers (CG3500748-062)

SKILLS

- **Machine Learning Tools:** PyTorch, Scikit-learn, XGBoost, Pymatgen, ASE, RDKit, MLPs (MACE, CHGNET, SevenNet)
- **Density Functional Theory:** VASP, CP2K, Gaussian

- **Molecular Simulation:** LAMMPS, RASPA, Materials Studio
- **Visualization:** VESTA, Ovito, Avogadro, Matplotlib, Seaborn
- **Programming Languages:** Python, MATLAB, Shell, Markdown
- **Languages:** Chinese (Native), English (Professional Knowledge), Korean (Basic Knowledge)

RESEARCH INTERESTS

- **AI4Science:** Accelerating materials discovery using artificial intelligence techniques.
- **Big Data:** Using natural language processing and large language model to construct MOF database.
- **High-Throughput Screening:** Multi-scale screening for gas storage and separation.

SCHOLARSHIPS AND AWARDS

- | | |
|---|-----------|
| • CBE FOCUS (JACS work) in School of Chemical Engineering at Pusan National University | 2025 |
| • CBE FOCUS (Matter work) in School of Chemical Engineering at Pusan National University | 2025 |
| • PNU Research (Matter work) at Pusan National University | 2025 |
| • Featured in the JCTC editorial on machine learning and statistical mechanics for contributing to next-generation chemical theory integration (JCTC work, Cover) | 2025 |
| • Excellent Poster Award (KSIEC-Busan) | 2024 |
| • Excellent Poster Award (KICChE-Busan) | 2024 |
| • Published as part of the Industrial & Engineering Chemistry Research (IECR work) virtual special issue “2023 Class of Influential Researchers” | 2023 |
| • Excellent Poster Award (KICChE-Busan) | 2023 |
| • Excellent Poster Award (KSIEC-Busan) | 2023 |
| • Excellent Poster Award (KSIEC-Busan) | 2021 |
| • Foreign Student Scholarship | 2020–2021 |
| • Excellent Professional Master’s Degree Thesis Award in Fujian Province | 2020 |
| • Excellent Master’s Thesis Award of Jimei University | 2020 |
| • Excellent Master’s Degree Graduate | 2020 |
| • M.S. Scholarship | 2018–2019 |
| • B.S. Scholarship | 2017–2018 |
| • Excellent Undergraduate Thesis Award | 2018 |

DOMESTIC / INTERNATIONAL COLLABORATORS

- North America:
 - Snurr Group @ Northwestern
 - HJK Group @ MIT
 - Rosen Research Group @ Princeton
 - Siepmann Group @ Minnesota
 - Sholl Group @ Georgia Tech
 - Moosavi Group @ Toronto
 - UCB, UCLA, CMU, Brown, ...
- Europe:
 - FX Coudert Group @ PSL University
 - Haranczyk @ IMDEA
 - Thijs Group @ TU Delft

- Asia:
 - *Song Li @ HUST*
 - *Koh @ KAIST*
 - *Lah Group @ UNIST*
 - *Hong Group @ KU*
 - *Lin Group @ NTU & OSU*
 - Northwestern Polytechnical University, Beihang, Beijing Institute of Technology, Chinese Academy of Sciences, ...
